### The world's best-selling cordless cap lamp

The award-winning Polaris cordless cap lamp is designed for use in the harsh environments of underground mining and tunneling operations.

Using a high-capacity lithium-ion battery, the Polaris houses its LED light in a highimpact dust- and water-resistant IP67 enclosure. Because it incorporates two light sources and an emergency flashing beacon mode, the need for an external cord is eliminated.

Polaris is the first MSHA-approved all-in-one cap lamp for coal mines.

All Polaris components are serviceable, increasing the life of the lamp, lowering the total cost of ownership and ultimately reducing waste.

### **NLT Polaris Features:**

- Cordless, lightweight cap lamp in an IP67 enclosure
- Main LED for high light output and secondary LED for auxiliary or emergency use
- Available in MSHA, IECEx / ATEX, ANZEx and non-certified models
- Components, including the battery, are fully serviceable
- Any NLT charging infrastructure can be retrofitted for the NLT Polaris

#### SPECIFICATIONS

Light output	7,000 Lux	
Discharge time	14 hrs minimum	
Charge time	Less than 10 hrs	
Weight	170g (6oz)	

Note: Technical specifications are subject to change without notice.
