

Aries

The Future of Cordless Cap Lamps Starts with Aries

For more than 40 years, NLT has set the global standard in cap lamp innovation, culminating in the launch of Aries, a revolutionary new cordless lamp built for the most demanding environments.

As the successor to Polaris Plus and Rebel Plus, Aries redefines cordless lighting. Replacing a legend like Polaris, the first cordless lamp and one of the most successful ever, required a bold, refined approach. Aries delivers a light that's smaller, lighter, brighter and more affordable. Its primary LED provides over twice the light output of Polaris Plus, and its Dual-Beam technology makes it ideal for any scenario, while a radial seal reduces housing stress. With Aries, NLT delivers the perfect blend of form, function and affordability.

Designed for comfort, Aries features a low-profile design and integrated adjustable clip that minimize head and neck strain.

Size comparison of Genesis, Polaris and Aries cap lamps

NLT Aries Features:

- **Dual-Beam technology:**
 - **Focused Spot** – NLT's traditional beam pattern
 - **Wide-Angle Flood Light** – a flat, even light; ideal for close-up work
 - **Dual-Beam** – combines both beam patterns to provide a center spot with great peripheral lighting
 - **Low-Light/Emergency Setting** – reduces light output when needed
- IP67
- Existing NLT chargers can be upgraded to accommodate the Aries and Aries Flex charger housings
- Components, including the battery, are fully serviceable
- Intrinsically Safe (IS) approval pending

SPECIFICATIONS

Light output	18,000 Lux
Discharge time	13 hrs minimum
Charge time	Less than 10 hrs
Weight	169g (6oz)

Note: Technical specifications are subject to change without notice.
